ESTABLISHED CATTLEYA PROPAGATIONS

Established propagations, from proven bloomers, provide a thrifty way to improve the quality of any collection. Given two to three years of good culture they will be blooming size plants of exhibition quality, worth several times the price paid. Number and size of bulbs, and the quality of the flowers, determine the price. Where two propagations of the same size are listed, at different prices, the higher priced piece will definitely produce higher quality flowers. Mainly we have only one piece of each item listed and suggest you indicate a second choice when ordering.
